Proves Knickerbocker has finer flavor than any other

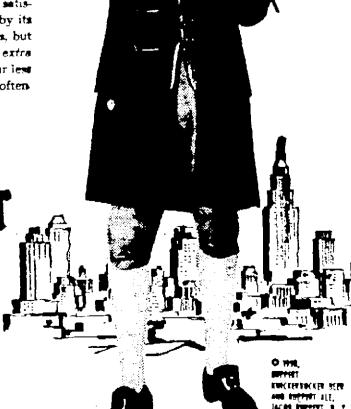

EXTRA LIGHT! . . FROSTY-DRY! . . LESS "FILLING", TOO!

Best-tasting glass of beer in town!

The secret behind Knickerbocker's amazing growth is a simple one: It's the most delicious beer you ever tasted! Knickerbocker contains a full measure of all the choicest ingredients that are needed to brew a full-bodied, truly satisfying beer. But Knickerbocker is brewed LIGHT . . . by its own exclusive brewing process. The full flavor remains, but the bulk is gone. So, sparkling-clear Knickerbocker is extra light ... frosty-dry ... a modern, low-calory beer that's far less "filling" than beers of the past. Enjoy it today ... enjoy it often

Pottstown Sketches

"Even at home he insists on three carbons."

* LITTLE RABBITS DIE-Jack O'Dell, 164 Reynolds avenue, went to Linfield two weeks ago to buy a pel rabbit for his 5-year-old son, Jackie. He was told by the man who sold it that the black and white rabbit was a male. The little boy was delighted by the pet. His parents were delighted it was a male. The other night, the father went to the cellar to clean the rabbit's pen. To his surprise, he found that the supposed male had just given birth to six little rabbits. The mother rabbit died during the multiple births. The parents did their level best to keep the six little orphan rabbits alive. Mrs. O'Dell, a nurses' aide at Pottstown hospital, fed them with an evedropper every two hours until she went to work in the afternoon. The father took over the eyedropper duties when he came home from work for Doehler-Jarvis division. YOUR HEALTH By HERMAN N. BUNDESEN, M.D.

A hip joint made of plastic material has brought relief to many people with painful, disabling arthritis of the hip. Many of these people can now walk without discomfort. Arthritis of the non-infectious type,

known as osteoarthritis, causes a marked distortion of the hip joint. There is extrahpping on the head of the thigh bone, or femur, and it cannot move too freely in the joint.

In certain severe cases, usually in elderly persons, the victim may become almost bedridden. He finds it very difficult even to rise,

and walking is practically an impossi-

bility. The pain is so severe that nothing seems to help. A new bone operation for this condition is used only in severe cases which have not responded at all to other types

If you look at a picture of a skeleton, you will see that the top of the thigh bone ends in a neck and a nob, or head, that fits into the hip joint.

Amsi area 88 Chily Eacon

In the operation, the hip joint is opened, and this head is removed with a portion of the neck.

-By BENNETT CERF-

FUTURE CHAMP, aged 7, came home with a black eye A FUIGHE CHAME, aged a community and loud declarations about what the other fellow looked and loud declarations about what the other fellow looked the like. "How did it start?" asked his secretly pleased Dad. "He

threw a stone and—then we really got gotn'," reported the future John L. Sullivan. "But Nealie," wailed his Ma. "why didn't you come and tell me when he threw that stone?" "A lotta good that would do," grumbled Nealie "You couldn't hit the side of a barn."

When Estes Refauver was campaigning last year, the garage attendant in a tiny village said. "Ain't I seen you some where before. Muster?" "It's

possible," conceded the senator, "that you've seen my picture in the papers." "I knew it!" chirped the garage attendant. Tell me, Mister, what was it you was cured of?" Copyright, 1953, by Bennett Cerl. Distributed by King Features Syndicate.

STRIKE A MATCH WHAT BECOMES OF THE FLAME?

An inexpensive little Want Ad was the spark that blazed the way to the founding of the Sears, Roebuck & Co., business. The partners of this great mail order business were brought together

by a 55c Help Wanted ad in the CHICAGO DAILY NEWS. In 1886 Richard W. Sears, who was station agent for the Minneapolis & St. Paul Railway in North Redwood, discovered that he could make money by selling watches by mail. He moved to Chicago. He needed a watch maker and adjuster, so he inserted the following ad in the DAILY NEWS:

"Watchmaker wanted with references who can furnish tools. State acr. experience and salary required. T38 Daily News."

The ad was answered by A. C. Roebuck. This was the beginning of a business which last year spent over 25 million dollars on newspaper advertising alone, and did a volume of business amounting to over 2

hillion dollars. Just (all 6000 To Strike Your Match

DAILY CRYPTOQUOTE-Here's how to work it: AXYDLBAAXR in LONGFELLOW

One letter simply stands for another. In this example A is used for the three L's, X for the two O's, etc. Single letters, apostrophies, the length and formation of the words are all hints. Each day the code letters are different.

John J. Sperat

A Quick Look at Your Neighbor

By BOB REID and NORMAN REED ENTHUSIASM, diligence and devotion to his family characterize John

J. Sperat, president of Maria Assunta lodge. At 25 years of age, he is the sixth and youngest president of the national convention of the ond meeting to discuss the census 321-year old organization. He was elected to his post the past December Elks in St. Louis, Mo., in July, which will be conducted by teachber, succeeding Jerry Ottaviano, who had held that position for the Seeders was named as alternate. past 20 years.

"Almost all of my spare time is taken up by the work at the lodge," he confided. "It's a wonderful organization."

The lodge, with an active membership of 500 persons, has been almost a second home to the dark-haired young man. Hejoined the organization when he was 16 years old.

During his 12 years with the lodge, he served two years inthe home committee and four years as vice president.

His father, Guy Sperat, was one of the charter members of Maria Assunta.

The vounger Sperat takes pride in pointing out the features of the lodge's new, two and onehalf year old structure. With a sweep of his hand, be

"I don't know what I'd do without my wife," he said. "Rearing a family of five is a full-time job." Does he plan to have more children? No, he said quickly.

"Five is a nice number. My wife thinks so, too." Commenting on how he busies himself as president, he said:

"I believe in teamwork. Each official is given responsibility, and the work is done by everyone pulling together.

Sperat also is a member of the Catholic War veterans and the Montgomery county Clubmen's association.

WHEN his lawn begins to "green up" a few weeks from now, the average Pottstown property owner will think about oiling up his lawnmower.

A few weeks later, when he finds the grass growing faster than he: can cut it, he will probably think of George S. Bliem. The reason is apparent when

you enter the Bliem Repair shop. in the rear of the owner's homeat 263 Master street.

There you will find lawn-mowers of all sizes and types, some new and some oid, some waiting for attention and others waiting for their owners to pick . them up after receiving the repairman's expert touch.

In fact, there have probably been more lawnmowers sharp. ened or repaired by this mild-. mannered man than by any other repairman in the Potts town area.

He estimates that he worked on about 1100 of them during the pasi year.

Strangely enough, he is almost as busy when there's snow on the ground as when the grass is growing.

"Winter is the time when mowers from the country club.

the golf courses, the private schools and hig estates come in for over-"Since each one of these places may have 15 hand moners and two

or three tractor mowers, I have enough to do." he smiled.

He remarked that most machines take a lot of cleaning before he can start repairing or sharpening them.

"They come in here covered with a crusi of sap from the grass, • • • combined with black grease and mud." he said. "It used to be quite a

problem before I got my steam jenny." He pointed to an outfit in the corner of his shop that consisted of a tank, a pump and a hose with a nozzle.

"You fill it up with a solution of water and nakite, which comes out the nozzle as steam under 100 pounds pressure." the repairman explained. "It takes the scum off but leaves the paint on." The same type of equipment is used in garages to clean the under

sides of automobiles, he added Bleim gets some movers to sharpen that have blades with edges

that resemble a saw more than a knife.

"Those are the ones the owners have been using as stone crushers." he grinned. "They take a lot of grinding before they're in good shape for cutting again?

Asked about the new-type rotary mowers, with a single kmfe whirl ing horizontally under a hood. Bleim called them the "lazy man's"

"They're for the people who don't mow their grass until it gets about six inches high." he asserted.

"A five bladed reel type mower does a smoother job," he added, "and for the fairways of a golf course the caretaker will use one with six-blades.

"On the greens, where the grass is especially fine, they use a special mower with eight blades on the reel and mow if every other

day." he remarked. To the property owner who would have a front lawn resembling a putting green. Bleim recommends a once-over with a 200- or 300-pound

roller at the right time in the Spring. "But you have to do it at the 'right' time," he warms "When the

frost is out and the ground is still wet but not too wet." He also recommends the use of chemical weed killers in the sum mer for those who would have a lawn resembling the top of a billiard

When business gets especially brisk, as he knows from experience it will in the next few months. Bliem calls in his 21-year-old son to help.

Carlton, the son, is a machinist with the Potistown Manufacturing company, having studied machine shop practice at Pottstown High. Bleim's first repair shop was the basement garage of his house, where he first began repairing lawnmowers as a part time job. He

He built the first above-ground addition to the old shop in 1943. As his business grew he added another addition three years ago. He now also sells various types and sizes of mowers. He even has

a sulky that can be attached to a power mower for those who would rather ride than walk after it.

Bliem was born in 1806 on a fruit farm at Ringing Hill, the son of Mr. and Mrs. Samuel S. Bliem. He has lived in this area all his life, Interested mostly in his work, he doesn't have any special hobby. He is a member of several organizations, though, including the Orioles, the Good Will Fire company and the Gilbertsville Fire com-

Here are the 125 single houses that have been built in Pottsgrove Manor in the West End in the past year. Running up the right side of the photo is West King street. Running across the bottom is Berks streets. The manor was built by F. A. Collins, mass builder of homes, who erected a similar project near Reading a few years ago. These houses have a living room, dining room, big kitchen, walk-in closet and bath on the first floor, and an expansion attic on the second floor. An architectural feature is the high placing of windows, which permits furniture to be placed under them. Lots are about 50 by 100.

—Aer at Pholo by Maurice A. Armes

In the center of this photo is Hillcrest, which was built eight vears ago by Curtis Schmidt, Reading contractor. Cutting across the picture, left to right, is North Keim street North and South Hill boulevards enter onto it. The houses-single and in groups of two, three or four have dining room, living room, kitchen, three bedrooms and bath, are of brick and frame construction and have full basements and a small affic. Near the top of the photo are 18 single homes being built by Alterman and Newman, Philadelphia contractors. They have three bedrooms, living room, kitchen and basement. They have stone fronts. Hillcrest is about nine blocks north of High street (toward the left. The streets parallel with Keim street are Hawthorne (lower) and Beechwood avenues

BEAUTIFUL NEW FUEL-SAVING BOILER

The Master Kraft Sun-Blaze Boiler Unit is so compact in design that it occupies only a third of the space formerly taken up by older types of boiler units of equal heating capacity. Its unusual compactness may be easily judged by looking at the illustration here . . . ver this boiler is so efficient that it will easily heat a six room house. Models only slightly larger will heat up to twelve room houses.

Electronic Control in this boiler gives split-second safety action, a great advance over all other boilers. Saves fuel with the Dual-Oxenizer, (Patented) which gives a double charge of oxygen to the oil, produces hottest oil fire ever developed.

with a Master Kraft Sun-Blaze hot water boiler unit — elim-inated dirt and labor connected with the old method of heating. A West Annapolis, Md., home owner used only 325 gallous of fuel oil in six months to hear a six room house, plus giving plenty of hot water for domestic use. A Philadelphia, Pa. home owner reports 40% saving in fuel oil cost over a period of a year, plus eliminating \$52.00 a year cost for domestic hot water. "Names supplied on request.

East End Single Homes

This Sunset drive section is the largest development of single homes in the East End. Most of them were built in the past ten years by Stanley Swinehart, although William E. Stauffer, Pottstown and Boyertown contractor, also built some in this aerial photo. The street in the upper left is Moser road. East High street is out of sight at the top of the photo. The two other streets are Cherry lane (lower) and Sunset drive. The well-landscaped development was just fields when

started. Building lots are a minimum of 50 by 100 feet. The homes are of brick construction and practically all of them have garages. Swinehart began the project early in World War II, which caused a delay in completing the houses. Most of the houses have three bedrooms.

If your family had lots of COLDS this winter...

of heating

WITH HARD COAL you get stendier, more confortable heat that protects yes ngninst winter illnesses! Cleaner—safer, tee! And ... with automatic equipment ... vou can cut fuel bills in half!

• Every winter many families suffer discomfort, colds and other winter illnesses as a result of "up and down" heat from nonsolid, so-called "modern" fuels. Here's what happens. The thermostat shuts off the fire completely. The warm air in the rooms rises to the ceiling. Cold areas and drafts are created.

You don't get "up and down" heat with hard coal. Heat with modern fully automatic hard coal equipment is thermostatically controlled—but your fire is never completely "off."

Big savings! With modern automatic hard coal equipment you get the convenience of automatic heating and, because you burn the cheaper sizes of hard coal, you save as much as half your present fuel bill! And ... if you have hand-fired equipment, you can still cut your fuel bill as much as 20% just by adding an inexpensive thermostat.

For full information on modern automatic hard coal heating, write Anthracite Institute, 101 Park Ave., New York 17, N. Y.

HARD COAL IS 8 WAYS BETTER:

1. Steadier, more comfortable heat

2. More even, healthful heat

Clean heat ... no greasy smudge or odor

4. Can't smoke under any conditions

5. Automatic Hard Coal cuts your fuel hill!

5. Safe heat ... no worries about possible explosions

7. You can store a full winter's supply in advance

8. Automatic aminiracite equipment gives you modern convenience

Sunrise Lane Rises Like Sun

This Sunrise lane development of Stanley Swinehart, veteran Potistown contractor, is one of the few rental projects built in the Polisionm area in recent years, and it's the largest built by a private contractor. That wide concrete street guiting across the bottom of the photo is Firestone boulevard. East High street is a few blocks to the right. Swinehart built Sunrise lane, the street running through the center of the project, without waiting for any borough aid. The homes at center and at left have been occupied since the past Summer. Here's an overall look at old and new Penn Village. The old units are in the foreground. That'-West High street cutting across the lower left. The new units are being finished this month, with the first tenants moving in vesterday. The new homes, 100 units of them, are of brick construction rather than cement block, as are the older ones. As were the old ones, the new ones were built by the Montgomery County Housing authority under US Public Housing authority. Basic idea of Penn Village is to provide decent housing for families with low incomes. Admission is based or the family's income in relation to the number in the family. Recently, the PHA raised the may imum amount that families can earn to be admitted to the project, and the maximum they caearn to continue there. PHA rules permit a normal rise in the family's income while in the project. There has been a heavy demand for the new apartment units having three and four ber rooms, a fairly good demand for the two edroom units and not enough demand yet for onbedroom units. That street running across the upper right of the picture behind the new units: Walnut street. In the upper right corner of the picture, Pottstown school authority will build th new West End elementary school being financed through a \$350,000 bond issue.

It's BEAUTIFUL! Kling Solid Mahogany!

> You'll thrill with pride when you have this lovely new Kling solid mahogany suite in your home. Designed by one of America's top designers, its colonial lines blend with either modern or traditional accessories. And the beautiful, new rich tone and lustrous new finish harmonize with practically any color scheme.

You may choose just the pieces you need most now and add others later as your needs change. For the suite is open stock, of course. Choose solid mahogany for lifetime satisfaction. The price is as attractive as the furniture-

How to Cultivate Your Good Taste

in painting a house, decorating room, upholstering or buying furniture, good taste is a personal thing and no one can say "this is right and that is wrong."

Each person's taste can grow. When we see something new, we should look at it again and again. If it is in good taste, chances are we will like it better every time
